OBJECTIVE

Aspiring Software Engineer skilled in MERN stack, Java, and Embedded systems and IoT, seeking an entry-level role to build scalable, user-centric applications while contributing to innovative projects and continuously enhancing technical skills

EDUCATION

B.Tech in Electronics and Communication Engineering Ramachandra College of Engineering, Affiliated with Jawaharlal Nehru Technological University, Kakinada	2022 – 2026 Eluru, AP
--	--------------------------

PROJECTS

Memory Archive – Memory Hub – Full-Stack Web Application	Jan – Feb 2026
- Built <i>Memory Archive</i> using Next.js, MongoDB & Tailwind CSS for a seamless, responsive experience for all devices - Implemented rate limiting and API protection with Upstash Redis, significantly improving system reliability and reducing server overhead by 45% during peak traffic spikes - Integrated Cloudinary for optimising image storage & high-volume uploads with peak stability Live Demo GitHub	
Have IT – Creator Marketplace Platform – Full-Stack Web Application	Oct 2025
- Built a marketplace platform connecting creators with customers, featuring JWT authentication, merchant dashboards, and dynamic product showcases - Developed RESTful APIs with Express.js and created a responsive UI with React and Vanilla CSS - Used MongoDB, Express, React, Node.js as the code technology stack Live Demo GitHub	
Music Player – Java	April 2025
- Created a command-line music player using Java Sound API, supporting WAV format playback with controls - Implemented file I/O and user input handling using core Java - Supported controls include play, pause, restart, and next/previous song navigation GitHub	

INTERNSHIPS

Full Stack Web Development Intern StudyOwl Education Private Ltd.	May – Jul 2025
- Built responsive web applications using the MERN stack to support the scalable user-facing features - Optimised database schemas and integrated RESTful APIs, improving data retrieval efficiency and application performance - Executed full-stack deployment workflows, strengthening server-side logic, API reliability, and database operations	
Embedded Systems & IoT Intern Blackbucks	Apr – May 2024
- Improved knowledge of IoT and embedded system solutions using microcontrollers, sensors, and communication modules - Developed a jewellery-security motion detection system using Arduino, sensors, and buzzer alerts. TinkerCad GitHub	

WORKSHOPS

- NodeMCU workshop held on **24 – 25 Sep 2024**, conducted by SRC E-solutions at Ramachandra College of Engineering
- Python machine learning and data analytics workshop held on **18 – 21 Oct 2024**, hosted by Synxa IT Pvt. Ltd.

SKILLS

Technical Skills Programming Languages: Java, C/C++, and Python Frontend: HTML, CSS, JavaScript, and React Backend: RESTful APIs, Node.js, and Express.js Database: MongoDB and MySQL Frameworks: Next.js and Tailwind CSS Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA, and MS Office	Professional Skills - Problem solving - Time management - Team leadership - Adaptability - Team collaboration
--	--

CERTIFICATIONS

C for Everyone – Coursera JavaScript Essentials – Cisco Networking Academy Data Structures and Algorithms – ScholarHat	Python for Beginners – Simplilearn Java Programming – NPTEL Front-end Web Development – MindLuster
